

RFID WRISTBAND FOR HEALTHCARE
DIRECT THERMAL/THERMAL TRANSFER

Our Direct thermal or optional thermal transfer (resin ribbon) embedded with a UHF or NFC transponder provides a great tool to identify and connect patients, staff, locations, procedures and equipment for patient safety & operational efficiency.

The RFID transponder comprises of a microchip and an antenna containing a unique identifier, which can be read, without contact, using a RFID reader/scanner, to retrieve patient information, allowing for seamless tracking & monitoring of patients throughout their journey in the hospital.

Hospitals can print a barcode + visual information and encode the RFID transponder, on-demand using a RFID enabled Thermal printer, allowing for improvement in patient administrative workflow. The bands can also be used by Patients to access RFID enabled lockers used for storing their valuables.

The wristbands are produced using a careful selection of medical grade materials which are soft & comfortable around the wrist. Materials are Non-allergenic, Latex free & phthalate free and come with optional antimicrobial protection.

The wristbands feature an adhesive closure with tamper evident security die cuts and offer exceptional thermal image durability for use up to 14 days.

Soft & Comfortable

Durable Material

Water Resistant

Tear Resistant & Stretch proof

Optional Anti-Microbial Protection

CE Certified

Latex Free and BPA Free

Custom Printing of Logos & Text

MATERIAL	Direct Thermal or Thermal Transfer film with Adhesive Closure	
CUSTOMIZATION	Printing upto 4 Colours with variable data printing, data encoding and UID printing	
SIZE	1 x 10 Inches (25.4 x 254 mm) 1 x 11 Inches (25.4 x 279.4 mm) 1 x 12 Inches (25.4 x 304.8 mm)	1.18 x 10 Inches (30 x 254 mm) 1.18 x 11 Inches (30 x 279.4 mm) 1.18 x 12 Inches (30 x 304.8 mm)
PACKAGING	125 wristbands per roll, Custom packaging also available	

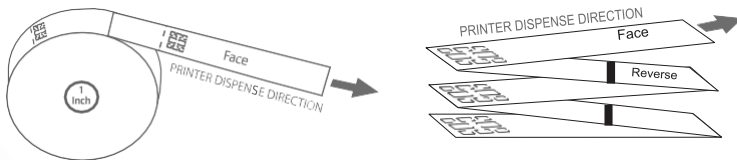

NXP I-Code SLIX II

NXP NTAG 213

NXP Mifare Ultralight EV1

NXP Mifare Classic EV1 1K

Impinj Monza R6P

- Custom Packaging Available in Roll or Fanfolded form
- Rolls can be offered with different core sizes as per customer requirements

- **DIRECT THERMAL**
UID.RF.DT.HWB.xxxxxxx

- **THERMAL TRANSFER (optional)**
UID.RF.Py.HWB.xxxxxxx
